"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."

-Dr. George Fee

I think the 1 hour meeting was great, it was informative and I think it would help those that are interested in a system

that is relative easy to follow and enable one to make money on small swings in the market using options.

*Thank You,

OptionProfessor Alert:
10/04/23 - Stocks-Just a Bounce or New Bull Market??

We hit the AREA of support WE talked about in the S&P 4205-4235 area last week. It was a great place to load up and we bolted out of that area Friday and earlier today. Many of you are excited that EARNINGS are coming which are expected to be good and further REVERSION to MEAN is possible in many markets that had tanked (Banks-Defense Contractors-Tech-Consumer Discretionary- Gold ect). We have PPI and CPI coming out and hopes are high for weakening numbers especially in services and owners equivalent rent.

The S&P 4175-4235 AREA is very important as it will either be the launching spot for a huge 4th quarter rally due to earnings and positioning. Should the S&P sustain moves UNDER that neighborhood; the odds that a recession and hard landing would go thru the roof in our view. Should this be the launching pad for Q4, we should be done with the 4200 handles on SPX. The GAP at SPX 4400 area and 4450 must be surpassed and sustained in order to truly turn this boat around. Seasonality would favor Financials, Discretionary, Tech, Small Caps ect.

WHAT'S the PROBLEM?....Here ya go....many longer term charts still have MOVING AVERAGES above the market pointing DOWN. Many of these markets are coming out of OVERSOLD status and thus if fueled by short covering and spec buying may have questionable legs. Moving Averages deal with PRICE & TIME so it requires more than price spikes to turn them around. We are monitoring this closely.

BOTTOM LINE...if you bought in the neighborhood we identified as a solid base (SPX low 4200's) OK....if the buy a big rally-CAVEAT EMPTOR

Where do we get OUR indicators? How do we INTREPRET the information and form opinions? When do we feel the ODDS are on our side? Great Questions! Many of you CHASE promoters of hot picks or other promotions that have cost a lot in more ways than one. WE hear you and appreciate your distrust in the financial information industry. WE have created something that is both SMART & FAIR.
