"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."

-Dr. George Fee

I think the 1 hour meeting was great, it was informative and I think it would help those that are interested in a system

that is relative easy to follow and enable one to make money on small swings in the market using options.

*Thank You,
Randy B.*

Get to know option professor on one of online webinar as a speaker, and was impressed by his concise way explaining of market movement. 10/13/23 - Stocks Hit with Inflation-All Bets Off??**

We have confidence that our readers know what a "No Brainer" means. Take a shot at the SPECIAL OFFER below. It is a "No Brainer"

OK....Let's Go!....We got PPI & CPI and both numbers came in hot especially Owners Equivalent Rent (OER) which was DOUBLE over last month and represents about 1/3 of CPI OUCH! The Fiscal Budget DEFICIT is huge at about 5.6% of GDP and now we have Ukraine and Israel to fund. Will the Fed cut rates (unless disaster hits) with INFLATION near DOUBLE their target and Govt Deficit that is totally out of control and Oil 80+?

We told you since 2022, HIGH INTEREST RATES are GRAVITY to asset prices & the Fed minutes switch talk on rates from how HIGH to how LONG. EARNINGS start tomorrow with JPM and other banks and they are supposed to be good. WATCH for Loan Loss Reserves and Net Interest Income The economy and the consumer have been a tough out (baseball talk:), but 5%+ money market AND 7%-8% mortgages should wear out both.

ALL BETS OFF? Not yet. We told you OUR Indicators said load the wagon between 4175 and 4250 is EXACTLY the neighborhood of good value. In fact, we will NOW say that that 4175-4250 is the FOUNDATION that had better not crack. If so, the door opens for retest SPX 3500 or 3200. For it to happen, the Magnificent 7 (GOOG MSFT AAPL META AMZN ect) would have to crack. Not yet BUT the RSI of their recent rally not good.

The reasonable man may ride out EARNINGS SEASON and reassess the portfolio, taking advantage of rallies to raise cash for redeployment ect. BOTTOM LINE- High rates=gravity to asset prices so rallies may have questionable duration. We told you buying strength is CAVEAT EMPTOR. Today you got a taste of what we mean. We follow OUR indicators and are HERE is help EDUCATE you on what they are and our interpretation

SPECIAL OFFER! OK Here's the no brainer we referred to upfront. We know you guys have spent a lot and received little chasing many touts. We know that many accounts are losing value this year. We know your level of trust in information providers is very low. OUR SOLUTION is>>>

At our discretion, we will send to you UPFRONT BEFORE you spend a dime....OUR Indicators AND a 1 hour ONLINE Meeting where we EXPLAIN.

You will be able to LEARN and ask questions, LEARN about Weekly Options, LEARN & REVIEW how OUR Indicators interpret YOUR markets. AFTER you get all this, should you believe you received VALUE, you will be asked to pay a ONE TIME ONLY Low Price.

WHO GIVES AWAY INFO & TIME UPFRONT? We do. #1 We KNOW we offer VALUE. #2 We think people are honest #3. It is a LOW COST Wouldn't you like to go back and get this kind of a deal from all the guys you went with? You're Right!
