"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."

-Dr. George Fee

I think the 1 hour meeting was great, it was informative and I think it would help those that are interested in a system

that is relative easy to follow and enable one to make money on small swings in the market using options.

*Thank You,
Randy B.*

IMPORTANT- Read About The SPECIAL OPPORTUNITY to Receive OUR Indicators AND a One Hour ONLINE Meeting. We Say It's A No- Brainer.

This was supposed to be the week of Big Tech Earnings stabilizing markets and that could not be further from the truth. OUR indicators showed acceleration to the downside since last week. The economic news indicates growth, jobs, spending, manufacturing turn up. It also shows 33%+ of consumers have more credit card debt than savings which is highest on record. We read 57% of consumers can't handle a \$1,000 expense. The savings rate is 3.8% and is less than half the norm and 80% lower than many suggest. And 49% have less or no savings than 1 year ago

STOCKS- We told you we were entering the ZONE of S&P 500 4175-4210 and today one of the reasonable outcomes went out the window. The other 2 outcomes are still in play. The market has closed UNDER the zone. If we are to have a good Nov-Dec, the market needs to climb ABOVE the 4175-4210 area relatively soon to return to the UPTREND. The 2nd outcome is the market stays UNDER 4210-4175 = hard landing

In 2018, the Fed was in a tightening cycle and the S&P had a correction of about 20%+ peak to trough. From SPX 4600 that would be about 3680
Next week the Fed meets and what a mess they get. GDP, Labor and PCE Friday, housing, discretionary spending still outside of Fed expectations
M2 Money Supply Growth on the rise and the Budget Deficits are financed by debt or printing money or both. VIX broke 20, ABOVE 23-25=30?
