The following testimonials have been received for the one-hour coaching session with The Option Professor, CALL 702-873-8038 to get started.

"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."

-Dr. George Fee

I think the 1 hour meeting was great, it was informative and I think it would help those that are interested in a system

that is relative easy to follow and enable one to make money on small swings in the market using options.

*Thank You,
Randy B.*

Get to know option professor on one of online webinar as a speaker, and was impressed by his concise way explaining of market movement. **OptionProfessor Alert:
11/02/23 - 2 Wars And Crude Drops \$10+ Bucks?**

IMPORTANT! Many received Our No-Brainer SPECIAL OPPORTUNITY. Why Wait? Info & Time Given UPFRONT. Only Pay if Satisfied!

We held support we spoke to everyone about on the S&P 500 at SPX 4109-4119 and spiked after Powell perceived as dovish. Yields backed off the overbought condition as we suspected. Ackerman covered Bond shorts and Druckenmiller says he's long the 2-year Treasuries and leveraged while short long-term bonds. Many think a recession slowdown either in 2024 or 2025. The thought is yields will then drop as economy slows, valuations contract and real estate buckles....throw in a spike in jobless rate

We have an inside month in November (meaning no new highs or new lows). This allows for pleasant family gatherings and Black Friday shopping. December is the month where if the markets would swoon to new lows...it may be then like 2018 (last Fed cycle).

We get 2 wars and Crude drops \$10+ bucks? Gold is on the ledge both in price and RSI. BELOW \$1980 and ABOVE \$2075 could ignite volatility as RSI greeting into peter out zone or acceleration zone. Paper currency's a store of Value? The Japanese Yen 50% OFF sale:) We told you Crypto was breaking up months ago as the younger generation still believes it as a store of value with more uses than Gold. AAPL earnings today and Jobs report Friday. LEARN what OUR indicators see both short term and long term. No sleeping at the wheel!

The VIX was saved at the bell from the blow of phase at 20-23. Stocks oversold short term being corrected this week. The Dollar is still holding up but yields backing down could bring sellers. Treasury FINANCING needs are soaring and seems mostly shorter term. Now the Fed is a specs on rates as clearly they hope the long end will dip (exactly opposite of Druckenmiller's belief that the structural deficits + hi rates=trouble.

We told you in August that Sept-Oct would be volatile. NOW we say that the end of 2023 and into 2024 will ALSO be very volatile markets.

SPECIAL OPPORTUNITY- At our discretion, we will Email you a LINK to our indicators we use to make our own market direction decisions.

We will set up an ONLINE meeting to explain our interpretation, short term options, REVIEW your markets with Our Indicators. A No Brainer ALL of this is given to you. ONLY if you are satisfied that you got good value will you be asked for 1- time LOW fee. If Not, You Pay NOTHING!
