"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."

-Dr. George Fee

I think the 1 hour meeting was great, it was informative and I think it would help those that are interested in a system

that is relative easy to follow and enable one to make money on small swings in the market using options.

*Thank You,
Randy B.*

11/09/23 - Stocks Stall? Gold-Oil-Dollar Yields Slip

Nov 9 2023

IMPORTANT- Don'T Miss Out on the SPECIAL OPPORTUNITY explained below!

The S&P 500 went up about 300 Points in the first week of November followed by about 30 Points so far in week two. The Gold Market lost about \$70 bucks from \$2020 to lows at \$1950 (we said pullback must hold \$1935-\$1950-it did). The Crude Oil market lost 10% in the last month and 68-70 is support while back above 78-80 may indicate reversion rally near term. The Dollar (DXY) did what we anticipated with yields backing off (less yield advantage) and lost about 3 full points. Closes under 103 could set up a move to long term support around 95-96 if yields break under 4.25% on the 10 yr Treasury. Yields were overbought short term at 5% so retrace expected to 4.50%-4.25%. More would surprise.

NEXT WEEK we get retail sales and CPI/Inflation news. The consumers are blowing up their credit cards with debt way over \$1 Trillion AND UP 40% since 2021!! We heard the average rate on cards is 20%! Inflation is not holding them back BUT the reality of interest on balances might. The correction in yields, assets rising in price, and a solid job market may give consumers confidence. EASING monetary conditions are not Fed friendly. The decline in gas prices may put more money in pockets to spend as well during the "season". The magnificent seven (NVDA MSFT AAPL META AMZN GOOGL ect is still garnering most of the action. Money flocking into passive funds forces managers to continue to buy them

The point of this alert is we are 6 weeks ahead of 2024 (that's very quick). In 2018, we got a terrible October and good November followed by a dodgy December. We are on alert for momentum and short term trends changing especially with a VIX at depressed levels. We're Ready to Go!
