*"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."*

*-Dr. George Fee*

*I think the 1 hour meeting was great, it was informative and I think it would help those that are interested in a system*

*that is relative easy to follow and enable one to make money on small swings in the market using options.*

*Thank You,  
Randy B.*

The Option Professor-DECADES of Knowledge-Educated Thousands-Traded  
Thousands of Options-Traded Millions In Stocks!

First off, sorry for not being able to get back to many of you. Get OUR  
Indicators Emailed to you AND an ONLINE meeting with Op Prof.  
We were in NYC for Thanksgiving and with Spikes in GOLD stocks in the last  
month like GFI (+24%) and HMY (+42%) we've been busy.

OK, we know that stocks have spiked up in the last 30 days parabolically. We  
hear Black Friday & Cyber Monday were great and GDP is +5.2%  
YIELDS have dropped as we said they would off the overbought 5% area on the  
10 yr. Treasury. We told you that Druckenmiller said he was hugely long the 2 yr.  
Treasury (looking for lower yields) and now Ackman is touting his new position  
that benefits from Fed cuts in Q1. Earnings in Q1 est +7+% and Q2 +10+%  
estimate. Lower rates and higher earnings....sounds great...so what could  
possibly go wrong from SPX 4600 area?

The Dollar's tanking from DXY 107 to 102+ and the 10 yr. Treasury has lost 75  
basis points and Gold's up \$100+ in a MONTH! What's it saying?  
Crude oil inventories dropped last week and if we clear \$80 then \$86 it'll will  
have its boat legs back. The Fed may pour cold water on cuts talk  
The consumer is spending yes but a taxi meter of credit card debt that runs  
constantly and Affirm (buy now pay later) may not end so well.

Hey...I've been doing this a long time so here's my concerns #1 the VIX has a 12  
handle (complacency & optimism is high) #2 A lot of short covering and advisors  
plowing their clients back in has been done #3 OUR Indicators have S&P  
moving averages 100-200-300 pts UNDER here.

So, do we step in front of this freight train? No. Are we preparing for a turn in the  
market should OUR Indicators provide evidence? You Betcha!

If you'd like to see how we caught Gold recently and why we avoided NVDA &  
many other times OUR Indicators have served us well-Contact Me  
UPFRONT at NO Cost NO Obligation, at my discretion, I'll Email OUR indicators  
LINK to you & Give YOU an ONLINE meeting to EXPLAIN-REVIEW

Email us at [optionprofessor@gmail.com](mailto:optionprofessor@gmail.com) or go to [optionprofessor.com](http://optionprofessor.com) your contact info. I'll call you personally and explain how we can help you

We told you of the volatility that Sept-Oct brought and subsequent spike in November. Makes sense to contact us now. We EXPLAIN OPTIONS!  
REMEMBER- Go to [TEEEM.org](http://TEEEM.org) and donate. I do. It's a great organization who does great work. In these poor countries, a little goes a long way  
Let me know how generous you have been with them and I'll be generous with my knowledge and time with you:)
