The following testimonials have been received for the one-hour coaching session with The Option Professor, CALL 702-873-8038 to get started.

"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."

-Dr. George Fee

I think the 1 hour meeting was great, it was informative and I think it would help those that are interested in a system

that is relative easy to follow and enable one to make money on small swings in the market using options.

*Thank You,
Randy B.*

Get to know option professor on one of online webinar as a speaker, and was impressed by his concise way explaining of market movement. During educational hour with him got clear understanding how to use different MA and RSI, as a main tools to catch a movement in right direction. Definitely recommend to receive education from him

OPINIONS & OBSERVATIONS

The Option Professor-Decades of Knowledge-Educated Thousands-Traded
Thousands of Options -Traded Millions\$ in Stocks

Let's talk about CONTRARIAN ideas! These are where markets are EXTENDED
and Positioning Huge. REVERSION to MEAN Potential!

OK...we're into 2024! What have we learned so far? MY opinions were that
stocks like AAPPL Apple were LOSING steam near the highs and once MY
indicators turned DOWN, I saw a great opportunity to get LONG puts on short
term options. The week 1 Jan 192.50 puts went from about 100 bucks to OVER
a grand since last week! Limited Risk and Leverage is why these short-dated
options have HIGH volume of trading.

Where is my FOCUS now as far as CONTRARIAN trades. Well, what has
changed since last month? The 10 yr. Treasury & the fever for rate cuts?
There are some large firms that are looking for a moderation in gains for tech
versus value & we have seen health care, staples, utils get bid up

My Contrarian FOCUS now is on ENERGY-STAPLES-HEALTH-UTILS potential
UPSIDE, the FINANCIALS & HOUSING potential on the DOWNSIDE.
Why? Supply demand dynamics for energy firm UNLESS we take out 65 Crude.
ROTATION to lower P/E's & Rates Higher for longer-lower P/E's

The Financials have EARNINGS coming out NEXT WEEK-will it be a buy rumor
and sell the fact? LAG effects to finally hit the Housing stocks?
Some of the FINANCIALS that may see changes would be consumer lending.
Maybe Affirm (AFRM) could see buy now pay later is pay never:):)

There are other markets I see potential in and also the USE OF HEDGING
positions (calls-puts same time) that may be a rescue club in incorrect
