*"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."*

I'm asking investors like yourself who have had an ONLINE meeting with me if you would like an UPDATE now

OK...here's what we've been saying.

#1 When AAPL was coming off 200 and the tech sector was hot 2 WEEKS ago we said it was PUTS time

The AAPL 192.50 puts went from around \$100 to OVER \$1000 on the week of Jan 5

#2 When OIL started slipping ( no pun intended) LAST WEEK we said it was PUTS time

SLB 50 puts went from \$25 to OVER \$200 earlier today

#3 When the banks were topping on MONDAY we said it was PUTS time

Citi (C) got a Sell indicator at 54.40 hit 51.40 earlier today after earnings

Not bad. The jobs report was strong. The CPI was hot. Williams of the NY Fed seems in no hurry to cut rates.

Credit card usage in October was about 5 Billion, in November OVER 23 Billion, with holidays what was December?

The VIX has filled it's GAP around 12.50 and we see RSI's diverging in the SPX QQQ IWM so what are we preparing for?

A potential REVERSION to the MEAN Ahead in many markets which has already started in some. BUT we need MORE trend proof

OUR Moving averages are NOT pointing down yet. PATIENCE- IF we roll over our target for SPX is 4550-4600—PLAN NOW

Sometimes COMBINATION strategies are best. I can explain the details.

PATIENCE is our KEY....First we wait for momentum to stall....Second we wait for OUR M/A's to ROLL....then we ride it.

EARNINGS season is upon us and reports and GUIDANCE will be key. Stocks have been bid up VIX is low. Rates calls may be wrong
