*"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."*

**OPINIONS & OBSERVATIONS**

The Option Professor-Educated Thousands-Traded Thousands of Options & Traded Millions\$\$ in Stocks

RIGHT NOW, some of you are wondering WHY the markets zoomed up today? Here's what I saw YESTERDAY to tip me off

The VIX was trading in the 14's and had a large GAP between about 12.50 and 13.50. In order to fill that GAP the VIX needed to fall. In order for VIX to fall the market needed to rally. I will now share with you not only what I saw yesterday but some my '24 options and reasonings

TWO MARKETS that I was focused on were Apple AAPL and S&P 500 Index SPY.

In my work, YESTERDAY, Apple AAPL hit MAJOR support around the 180 area and had a MAJOR RSI Divergence (25 vs 39) with my 5 day chart indicators turning UP. This told me the SELLING was drying up, a GAP (192-188) to be filled, and the VIX needed to rally to fill the GAP.

CALL OPTIONS for both those expiring THIS WEEK & NEXT WEEK with strike prices at 185 & 187.50 were VERY CHEAP and LIMITED RISK.

Today, the Week 3 AAPL 185C and 187.50C closed up 795% & 1,327% and Week 4 AAPL 185C & 187.50C close up 221% & 298% respectively

VOLUME in these option ranged from about 30,00-50,00 to as much as 126,00 187.50C week 3. These are NOT typical but illustrate a points.

One points it illustrates, short term LONG options are VERY RISKY. They offer LIMITED RISK and LEVERAGE. You Need Timing-Risk Management

Regarding SPY, YESTERDAY, my work recognized RSI divergence around the 470 area and a turn up signal around 472. This led to the rally today

The QQQ and IWM followed suit albeit at different speed. In the LAST 30 DAYS, there have been a number of markets that have trended well

MY FOCUS -late December AAPL PUTS off the 200 highs, Early January Devon Energy DVN PUTS, OXY PUTS, HAL PUTS SLB PUTS and Newmont NEM PUTS. From Last Week to This Week, bank stock PUTS and PayPal CALLS & Long COLLARS on a number of stocks I see as "on the ledge"

For next week, I am focused on Apple, Banks, Energy, Gold, Communications-Payment Processors----Want More Specifics? Call me.
