**The following testimonials have been received for the one-hour coaching session with The Option Professor, CALL 702-873-8038 to get started.**

---

*"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."*

*-Dr. George Fee*

---

*I think the 1 hour meeting was great, it was informative and I think it would help those that are interested in a system*

*that is relative easy to follow and enable one to make money on small swings in the market using options.*

*Thank You,  
Randy B.*

---

*Get to know option professor on one of online webinar as a speaker, and was impressed by his concise way explaining of market movement. During educational hour with him got clear understanding how to use different MA and RSI, as a main tools to catch a movement in right direction. Definitely recommend to receive education from him*

*Oleg B.*

**OptionProfessor Alert:  
03/01/24 - Stock Market to Drop? Not Yet But...**

The stock market has been choppy lately after the big run with small caps (IWM) gaining steam. There also has been near panic into BitCoin where stocks like COIN have gone UP 100% DOW about 38.2% (Fib retrace) and NOW UP 75% in 3 weeks! WOW!

Who is selling into all this buying? Is the RSI confirming this run or is there a DIVERGENCE suggesting it is running out of steam?

Great questions!.....Here's my view.....market makers have been the primary sellers and are counting on a reversion to the mean to get paid. What does that mean? To me, it means that they see the LARGE volumes coming in and are RAISING prices to a point that is FAR above the Moving Averages & at some point prices will revert back toward the moving averages (either to short term (minor dip) or longer (major dip).

I think they will get this result. The question is...when? Seasonally, March and April can be challenging AND so can be the GAP in earnings seasons (rumors and innuendos, projections replace results). Is there a way to determine when and if this will start? I believe in two ways.

I have my timing indicators and my interpretation of those indicators (opinion). Generally, they are based on momentum, trends and VIX.

What's extended?....you know....tech, semis, home builders, financials, crypto, health care ect.. What's not? Energy, Industrial Metals, Inter.

February has been one for the books BUT it ends tomorrow. do you think we will continue unabated thru Feb & Apr? good luck with that.

I have favored buying 2 sided option strategies lately and have been very happy with that tactic. Some markets (AAPL) saw 2 side action. BUT....my main focus right now is to monitor the momentum and moving averages for signs of a turn as skews a VIX RISING off 13.

No to Boast....but I have traded thousands of option contracts and received training at The Options Institute CBOE in Advance Options Training Do you think I can help you better understand options trading? I believe so.

How to get started? Easy! Go to [optionprofessor.com](http://optionprofessor.com) and submit your contact info. I will call you back personally to EXPLAIN how I can help. I will send a LINK to my timing indicators. We will have a 1-hour ONLINE meeting to EXPLAIN my best ideas and REVIEW your ideas-questions. Should you need more information on the uses and risk of option strategies AND entry and exit strategies.....I can help.

We are off to a big year so far in 2024. This is a great time for us to talk and prepare for the months ahead. NO annual NO monthly fees!

Looking forward to speaking with you.....you're going to like the way this works.
