"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."

I think the 1 hour meeting was great, it was informative and I think it would help those that are interested in a system

that is relative easy to follow and enable one to make money on small swings in the market using options.

*Thank You,

Opinions & Observations

OK...This QUICK ALERT is focused on the anatomy of a good trade in my opinion. I hope my insights & perspective will be helpful

Las Vegas Sands (LVS) announced EARNINGS yesterday. I had been following the stock very closely. It is a major gaming player.

Prior to today, LVS had been trading in a tight range of 51.50 and 49.50 since late last week. This reduced the implied volatility.

Based on my indicators for trends and momentum, I looked at LVS from a long, intermediate and short term perspective.

My conclusion was that resistance was around 54 and support at 50. My bias was to the downside based on my timing indicators

Among other things, I viewed the tight price range, the earnings news, and recent volatility of stock prices after earnings as important

My feeling was the earnings report, and the general market mood may cause LVS to have a huge move IF we saw an EARNINGS surprise

Yesterday, The LONG-STRANGLE expiring this Friday was interesting. LVS 54 calls were about 40 cents, the 49 puts 60 cents=\$1 a buck!

I saw my trend indicators showed a softening of the trend and momentum indicators showed divergences suggesting weakness.

Las Vegas Sands EARNINGS showed a huge jump which one might have expected LVS to explode up in price scaring bears, feeding bulls.

BUT they also announced lighter than expecting numbers out of Macau and construction in Macau....both very unwelcome news.

Today, LVS DROPPED about 10% to around 45.50 and the Weekly 49 puts went 3 ½ dollars in the money or \$350 per option. Not bad.

This is an example of why STRANGLES can make sense before EARNINGS if the premiums make sense versus expected-actual volatility.

Many Investors Trade Short Term Options. Timing is very important. The risks are very substantial on both the buy and sell side.

INVITATION- With much of EARNINGS SEASON still to come, I invite you to GET my timing indicators and an ONLINE meeting to LEARN How to Get Started? Easy! Go to optionprofessor.com or optionprofessor@gmail.com and submit your contact info. I'll Contact You.
