The following testimonials have been received for the one-hour coaching session with The Option Professor, CALL 702-873-8038 to get started.

"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."

-Dr. George Fee

I think the 1 hour meeting was great, it was informative and I think it would help those that are interested in a system

that is relative easy to follow and enable one to make money on small swings in the market using options.

*Thank You,
Randy B.*

OPINIONS & OBSERVATIONS

The Option Professor-Traded Thousands of Options & Millions in Stocks.
Trained at The Options Institute CBOE- Advanced Options

We are about to enter June next week and Markets (Stocks, Oil, Gold-Silver, Interest Rates, Crypto, Dollar, China may get VERY Interesting.

Friday, we'll get the PCE which may improve from the month prior BUT is still way above target and WAGES & SPENDING is growing still.

Treasury Auctions are not going well...Why?...how about \$1 to \$2 Trillion Dollar Fiscal Deficits and The Trump-Biden Show as the future?

One guy has proven he & Yellen are spenders and do you think Trump isn't going to want to hit the presses & low rates (GDP & Real Estate!)

Many markets have had BIG RUNS and are MILES ABOVE their long-term moving averages setting up REVERSIONS in July-Sept (as usual). AI/Tech (NVDA MSFT AMZN GOOG DELL HPQ) and others have come off their highs (META AMD SMCI). Other sectors like METALS (NEM XME FCX) have also seen big runs. LIMITED RISK put options get very cheap in that environment and then if a correction (reversion) occurs-score!

One of the reasons I troll for the contrarian opportunity is that If I'm wrong, the risk is limited to the premium but a spike in Vol can be good.

Obviously not always the case, we see in the last couple months ENERGY shares (DVN 55-46+) (SLB 55-45) XOM (123+-112+) and TECH stocks such as SMCI (1200-700) AMD (227-140) TSM (158-125) and earlier even AAPL (200-165) explain why I keep a watch for REVERSIONS to Mean Which ones am I watching now??

How do I go about locating potential REVERSION opportunities? Easy! I rely on many things including My Timing Indicators and Options Tactics.

Whether it be Crypto (GBTC ETHE) or Stocks or Gold-Silver-Copper or AI-Health Care-Pharma-Consumer Discetionary-Staples, I look for Reverts
