The following testimonials have been received for the one-hour coaching session with The Option Professor, CALL 725-254-6423 to get started.

"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."

-Dr. George Fee

I think the 1 hour meeting was great, it was informative and I think it would help those that are interested in a system

that is relative easy to follow and enable one to make money on small swings in the market using options.

*Thank You,
Randy B.*

Get to know option professor on one of online webinar as a speaker, and was impressed by his concise way explaining of market movement. During educational hour with him got clear understanding how to use different MA and RSI, as a main tools to catch a movement in right direction. Definitely recommend to receive education from him

Oleg B.

OptionProfessor NEW Alert:
07/30/26 - Can Stocks Turn? 4 Sectors- 2026 Best IDEAS

Hi Everybody! The Key Word in the last month globally has been Deleveraging. It's not permanent. Watch Out for a Turn

This week we got the Fed No-Decision and Earnings from MSFT and META- Thursday AAPL AMZN

The markets loved MSFT (cloud UP 42%) and META (revenue OK/Cap Ex a bit high). Risks AAPL-smart phones/AMZN Energy \$\$

Stock Indexes/Technicals sold off to, in my view, very important levels. The VIX is right around 20 and while it can spike briefly above but the Bulls need it to back off 20. The Percent of Stocks Above the 200-Day Average has held the 55-50 level. Breaks may spell acceleration to the downside. The S&P 500 (SPX) tested 7300 area (about -300 pts in 6 weeks). The QQQ tested the 660 level. On the Ledge? Absolutely. Overnight the Kospi Index (Korea), The S&P 500 and the Nasdaq were turning up. Dead Cat Bounce?

As the adage goes, it's a market of stocks, not a stock market. Here's 4 sectors that seem to have been outperforming.

1. Enterprise Software Stocks examples ADBE CRM WDAY CRM MSFT
2. Energy Stocks examples XOM COP FANG LNG OXY
3. Health Care examples BIIB TEVA NVO CAH ABT
4. Consumer Staples examples TGT KO MDLZ DG DLTR

BIG PROBLEM-No end in sight to spending BUT negative free cash flow means BORROW and the 10-yr Treasury rate RISING

Here's my view:

KEY METRIC- To me, the Percent of Stocks Above the 200-Day Average and the VIX. Why? Because it hit 60 (resistance) and closed at about 55. A CLOSE above 60-65 or under 50 may accelerate-SPX 7600 or 7000. For Bulls VIX under 20 needed

RISKS Continue-Oil spiking/War escalating-Deleveraging-Inflation Fears (PCE)- Consumer-AI-Fatigue-Cap Ex Appetite/ Costs at Risk
