[Sign up now and transform your trading!](#)

Keep scrolling for today's alert.

The following testimonials have been received for the one-hour coaching session with The Option Professor, CALL 725-254-6423 to get started.

"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."

-Dr. George Fee

I think the 1 hour meeting was great, it was informative and I think it would help those that are interested in a system

that is relative easy to follow and enable one to make money on small swings in the market using options.

*Thank You,
Randy B.*

Get to know option professor on one of online webinar as a speaker, and was impressed by his concise way explaining of market movement. During educational hour with him got clear understanding how to use different MA and RSI, as a main tools to catch a movement in right direction. Definitely recommend to receive education from him

Oleg B.

OptionProfessor NEW Alert:
08/27/26 - Today! Results NVDA CRM CRWD Best Ideas

EARNINGS out and PRICES are jumping on NVDA Salesforce CRM and CrowdStrike CRWD

AI Enterprise Adoption is Alive & Well!

Today we got results from CrowdStrike CRWD as revenues were up 26% and they raised full year guidance-stock UP 10%+

We also got results from Salesforce CRM revenue up 10%+ but AI & Data ARR up 210%-full year guidance up--stock UP 10%+

The Big News of course was NVDA's Earnings so let's dive in. We'll look at the positives, the negatives and potential RISKS

#1 Positives- Revenues were UP over 100% and guided to \$108 billion. Data Center revenue up 116%. Buybacks -\$60 Billion Margins are at 75% but guided to 74%. Three (3) hyper scalers (AMZN AWS, MSFT Azure, GOOG Cloud) = 92% of total revenue Others, ACIE (AI cloud, Industrial, Enterprise) & Edge Computing Platforms (gaming, PC, work stations, robotics, automotive). VERA RUBIN is in full production and New Vera CPU for autonomous AI agents. Do the big 3 need to upgrade? It's believed to be a structural necessity. Why? The AI spend now is said to be 90% around inference workloads. The VERA CPU completes workloads 2x faster, delivers 35X higher inference performance per watt = energy efficient, and 10X lower token costs. If true, that's a lot. This helps protect both margins and pricing power as renting out compute is going at a premium price right now.

#2 Negatives- in my view, it's the sheer difficulty of beating and adding to results that are already sky high to build further growth. This is especially true when you are already sold out and capacity restrained. NEXT big growth drive may actually be ROBOTICS. The cost of memory procurement doubled to \$275Billion and the firm may be raising prices 15%-17% according to reports.

#3. RISKS- NVDA is a designer of chips and then has TSM manufacture the chips at a relatively low cost ultimately markup 900%. Should alternative ways to deliver AI emerge, costs of infrastructure/architecture may need to be written off. Margins/Prices Cut. NVDA is clearly in a rush (circular financing etc.) and is trying to sustain a dependence on their chips. This may not be sustainable

AMD and GOOG and CHINA are but among a group trying to compete in the chip space and over time may be formidable foes.

NVDA prices after the earnings announcement faded but after the earnings call went into the green by about 5%. Let's see Thurs.

Finally, my CRYPTO CALL that the 200-week moving average (historically a low in winter crypto cycle) held up exactly around \$60,000 and I said in my ALERTS "whales" known better as institutional/long term holders gobbled up 2.75 Billion recently. Stocks such as MSTR BMNR BTDR COIN CRCL GLXY IBIT all spiked. Did your information sources tell you that BEFOREHAND?

Are you getting your Options IDEAS & Education from another company? You really should include us. It's definitely time. You Need to LEARN (Options Master Class Free \$395 value), Want IDEAS/REVIEW-Alerts Weekly, Want Clarity? I'm here to help

ALL included. Just starting out? I've taught thousands personally. Do you have experience or a real pro? Let's see how we can improve.

Now's the time before Sept/Oct when changes may be dramatic. Hit Complete Purchase=Immediately Get Receipt & Options Course

Helping Options Traders Understand the Uses & Risks of Options Trading for Over 30years!

Welcome Back Everybody! After Bessent Rescues, Stocks S&P 500 SPX tries to avoid the GAP at 7600 with VIX 14+/Pct Above 60+

At our Lunch N Learn meeting Tuesday, I emphasized the health care sector and gratefully that was solid information (MRNA MRK BMY GILD BIIB etc.) all benefitting from the news of the new vaccine from MMRK & MRNA. The big mover Wed. was MRNA who hit \$176+.

However, it may be time to realize much of the MRNA SPIKE may be from short covering. Let me explain. From what I read, MRNA had about 13% to 15 % short interest. Volume Wed. was 195M shares versus an average of 6.8M (28X+ normal volume). Only one word-HUGE!

Who's selling when everyone is buying. In part, market makers. Do you think 195M is sustainable? Will price revert off \$180 area? Let's see

BOND BULLS-a good news day as Bessent's maneuvers are trying to cap longer term yields (10 & 30) and the markets see an easing move. MARKETS reacted with up moves in Health Care (CRSP TWST TXG etc.) Metals (GDX SIL XME), Homebuilders (DHI TOL PHM KBH etc.)

Finally, my CRYPTO view is that the 200-week moving average (historically a low in winter) has held up well around \$60,000 and the "whales" known better as institutional/long term holders gobbled up 2.75 Billion recently according to reports. Bitcoin & Ethereum rose on Wed..

Stocks such as MSTR BMNR COIN CRCL GLXY IBIT all benefited from the perception of "double+" from the Treasury/Clarity Act News.

Are you getting your Options IDEAS & Education from another company? You really should [include us](#). It's definitely time.

You Need to LEARN (Options Master Class Free \$395 value), Want IDEAS/REVIEW-Alerts Weekly, Want Clarity? I'm here to help
