Keep scrolling for today's alert.

The following testimonials have been received for the one-hour coaching session with The Option Professor, CALL 725-254-6423 to get started.

"In a world of countless analysts, Option Professor stands out. His sense of perspective on all markets and sectors elucidates the big picture, as well as the shorter term. His observations have been remarkably prescient. He is a true, selfless teacher, being highly accessible and incredibly generous with his time. I regret that I did not find this class-act earlier."

-Dr. George Fee

I think the 1 hour meeting was great, it was informative and I think it would help those that are interested in a system

that is relative easy to follow and enable one to make money on small swings in the market using options.

*Thank You,
Randy B.*

NEW! Option Professor Flash Alerts (Mid-Week Low-Priced Options Ideas)

Hello Everybody! Stocks have been dropping and interest rates (yields and mortgages) are rising as well as oil prices!

What is Going On and What's Coming Up?

KEY POINTS:

1. Oil prices held \$90-\$85 support-bounced and potentially could spike up gain as peace is elusive. Under \$80-cools fears.
2. Treasury yields (10yr) hit 5.25%+ which threatens debt costs for both Tech-AI-Small Caps and US Government (deficits)
3. Volatility-Despite all the fears of inflation and higher yields-the VIX remains behaved UNDER 18-20= very constructive
4. Breadth-the expansion of the rally is dead for now with the risk of downside acceleration under 40 very real. Must turn soon
5. Key levels on S&P 500 (SPX) support 7675-7640-below that 7525-7475. Resistance is 7750-7780 to be cleared before breakout
6. GOLD- prices broke support \$4350, and as we said, higher yields can devastate prices. Let's watch Crypto prices this week

THIS WEEK

1. GDP and PCE (Personal Consumption & Expenditures) and the New Jobs Report on Friday (Fed's mandate inflation-stable jobs)
2. Sept 30 reconfiguration of inflation may ease rates as memory costs, portfolio fees, tariffs, oil prices may ease-inflation eases
3. Sentiment and Positioning seems to be leaning bearish so if the PCE & Jobs Numbers are OK-potential scramble to cover-buy
4. REVERSION to mean, for now, seems to be widespread from many sectors thru Mag 7. Micron earnings Wed may be stimulative

In sum, the next 2 weeks are key before we get too close to the election (October Scare). Ask me about hedging & portfolio protection

[NEW Ideas will be going out to subscribers this week!](#) If you have any options questions-you can text me to discuss your choices!
